

ALPHA LITE

In today's world powerful forces are reshaping the Credit Union industry. Customer expectations, technological capabilities, regulatory requirements, demographics and economics are together forcing your business to change. Credit Unions need to get ahead of these challenges and retool to win. They must not only execute on today's imperatives and realities, but also radically innovate and transform themselves for the future.

Alpha Lite Delivers

Customer Experience

Friendly. Comprehensive. Easy to navigate. Empowers users to self-serve and get the information and transactions they require done fast and at their fingertips.

Effective Operations

Alpha-Lite is function rich and covers all operational features required to run your Credit Union.

Increased Productivity

Greatly reduces human intervention minimizing risk to your operation, allowing your staff to focus on providing more and better service to your members.

Scalable and innovative

Grows with your business needs so you only pay for what you need, allowing you to add functionality as required, easily and with minimum risk and disruption to your operations, all with world class innovative and reliable technology.

Affordability

No more expensive platforms with special requirements not adequate to your operations and budget. It runs using affordable hardware and software, maximizing your investment and return.

Ease to Deploy and Support

It all runs on one server, including high availability and automated local backup services. We take care of the initial set up and support for you, eliminating the need for lengthy deployments and dedicated support staff.

Features

Alpha Lite offers a secure and fully integrated core banking solution. It includes real-time processing, document management, and interfaces with both internal and external systems. Delivered in an easy to use Graphical User Interface. Alpha Lite is a member centric banking solution that allows the flexibility to create products quickly and is available as a hosted or data centre solution.

- Web Based
